Attitudes of Success in Network Marketing
Winning the “mind” game.

My intention is to fill my business with top leaders.

The universe is helping me. Incredible people just come to me now.

My subconscious mind is working with me, to help triple my income and my time off.

I deserve to be successful because I add value to people’s lives.

Network Marketing is making me rich.

I am surrounded by smart, brilliant people who make me laugh. My days are stimulating and exciting.

I help people. I am kind, generous and an amazing teacher.

I am a good leader and people look up to me.

I am truly grateful for every distributor I have now.

I always put myself first.

Every day my subconscious mind is working with me to help create the thoughts and habits that will make me a multi-millionaire.
